National University of Uzbekistan
Tashkent, Uzbekistan

Abstract: This article discusses the relationship of English with other languages. As the world becomes more connected, the relationship between English and other languages will continue to evolve. English will continue to be a dominant language in many parts of the world, but it will also continue to borrow and be influenced by other languages. Overall, the relationship between English and other languages is a complex and dynamic one, and it will continue to shape the way we communicate and interact with each other in the years to come.

Key words: relationship of English, dominant language, Latin, Norse, Celtic languages.

INGLIZ TILINING BOSHQA TILLAR BILAN BOG'LIQLIGI

Annotatsiya: Ushbu maqolada ingliz tilining boshqa tillar bilan bog'liqligi muhokama qilinadi. Dunyo bir-biriga bog'langan sari, ingliz va boshqa tillar o'rtasidagi munosabatlar ham rivojlanishda davom etadi. Ingliz tili dunyoning ko'p qismlarida dominant til bo'lib qolsada, lekin u boshqa tillardan ham ma'lum so'zlarni o'zlashtirish va ta'sir qilishda davom etadi. Umuman olganda, ingliz tili va boshqa tillar o'rtasidagi munosabatlar murakkab va dinamik bo'lib, u kelajakda ham bir-birimiz bilan muloqot qilish va o'zaro munosabatimizni shakllantirishda bir vostia bo'lib qoladi.

Kalit so'zlar: ingliz tili, dominant til, lotin, norse, kelt tillari munosabati.

СВЯЗЬ АНГЛИЙСКОГО ЯЗЫКА С ДРУГИМИ ЯЗЫКАМИ

Аннотация: В данной статье рассматривается связь английского языка с другими языками. По мере того, как мир становится все более связанным, отношения между английским и другими языками будут продолжать развиваться. Английский по-прежнему будет доминирующим языком во многих частях мира, но он также будет продолжать заимствовать и испытывать влияние других языков. В целом отношения между английским и другими языками являются сложными и динамичными, и они будут продолжать формировать то, как мы общаемся и взаимодействуем друг с другом в ближайшие годы.

Ключевые слова: родство английского языка, доминирующий язык, латинский, норвежский, кельтские языки.

Introduction

English is a global language that is spoken by over 1.5 billion people worldwide. It is the primary language of international trade, politics, and science, and is used as a second language in many countries. Its popularity has led to the development of many English-based pidgins and creoles, as well as the adoption of English words and phrases into other languages. In this article, we will explore the relationship of English with other languages, and examine how English has influenced and been influenced by other languages.

The main findings and results

The Origins of English

English is a Germanic language that evolved from the Old English language spoken in England in the early Middle Ages. Old English was heavily influenced by Latin, Norse, and Celtic languages, and underwent significant changes over time. In the 11th century, the Norman conquest of England brought French-speaking people to the country, and as a result, Old English began to take on many French words and phrases. This period of linguistic change is known as the Middle English period.

During the Renaissance, Latin was considered the language of scholarship and science, and many English words and phrases were borrowed from Latin. In the 17th century, the Royal Society was founded in England to promote scientific knowledge, and its members used English as their primary language of communication. This led to the development of many new scientific and technical terms in English, as well as the adoption of words and phrases from other languages.

In the 18th and 19th centuries, the British Empire expanded rapidly, and English became the language of trade and commerce in many parts of the world. As a result, English was adopted as a second language in many countries, and it began to evolve in different ways in different regions. This led to the development of many English-based pidgins and creoles, which are simplified versions of English that have developed unique grammatical structures and vocabulary.

English and Romance Languages

The Romance languages, which include French, Spanish, Italian, Portuguese, and Romanian, are descended from Latin, and they share many similarities with English. For example, many English words have Latin roots, and English grammar has been heavily influenced by Latin grammar. In addition, many English words and phrases have been borrowed from French, which was the language of the English aristocracy for many centuries.

French loanwords are particularly common in English, especially in the areas of law, politics, and cuisine. For example, words like “attorney,” “jury,” and “parliament” are all derived from French. French has also influenced English pronunciation, as many English words are pronounced with a French accent. For example, the English word “debris” is pronounced “deh-bree,” which is similar to the French pronunciation of the word.

Spanish has also had a significant influence on English, particularly in the areas of food and music. Many English words for foods, such as “taco,” “burrito,” and “enchilada,” are derived from Spanish. In addition, Spanish-speaking countries have contributed many musical styles and genres to the world, such as salsa, merengue, and reggaeton, which have all had an impact on English-language music.

English and Germanic Languages

English is a member of the Germanic language family, which includes languages like German, Dutch, and Swedish. As a result, English shares many similarities with these languages, such as similar grammar and vocabulary. For example, the English word “house” is similar to the German word “Haus,” and the Dutch word “huis”.

German has had a significant influence on the English language, particularly in the area of philosophy. Many influential philosophers, such as Immanuel Kant and Friedrich Nietzsche, wrote in German, and their works have been translated into English. As a result, many philosophical terms in English are derived from German, such as “zeitgeist,” “weltanschauung,” and “angst”.

Dutch has also had an impact on English, particularly in the areas of trade and commerce. English borrowed many Dutch words related to shipping and trade, such as “yacht,” “sloop,” and “skipper”. In addition, Dutch has influenced English pronunciation, as many English words with “ch” sounds, such as “church” and “cheese,” are pronounced with a Dutch-sounding “g” in Dutch.

English and Asian Languages

English has had a significant impact on many Asian languages, particularly in the areas of science, technology, and business. Many scientific and technical terms in Asian languages are borrowed from English, and English is often used as a second language in these fields. In addition, many Asian countries have adopted English-based educational systems, which has led to the development of many English-based pidgins and creoles.

In turn, Asian languages have also influenced the English language, particularly in the areas of food and martial arts. Many English words for foods, such as “sushi,” “ramen,” and “kimchi,” are derived from Japanese, Chinese, and Korean. In addition, many English words related to martial arts, such as “karate,” “taekwondo,” and “kung fu,” are derived from Japanese, Korean, and Chinese.

English and African Languages

English has had a significant impact on many African languages, particularly in the areas of education and politics. English is often used as a lingua franca in African countries, and it is the primary language of instruction in many schools and universities. In addition, English is the official language of many African countries, and it is often used in government and business.

African languages have also influenced the English language, particularly in the areas of music and culture. Many English words related to African music and dance, such as “jazz,” “samba,” and “reggae,” are derived from African languages. In addition, many English words related to African culture, such as “jungle,” “safari,” and “voodoo,” are derived from African languages.

Conclusion

English is a global language that has had a significant impact on many other languages. Its popularity has led to the development of many English-based pidgins and creoles, as well as the adoption of English words and phrases into other languages. Likewise, many other languages have influenced the English language, particularly in the areas of food, music, and culture.

As the world becomes more connected, the relationship between English and other languages will continue to evolve. English will continue to be a dominant language in many parts of the world, but it will also continue to borrow and be influenced by other languages. Overall, the relationship between English and other

languages is a complex and dynamic one, and it will continue to shape the way we communicate and interact with each other in the years to come.
