**Abstract:** Let me be clear in advance: No program will suddenly turn you into a translator or a language scholar. These are only helpers. The main thing is your ability, enthusiasm and aspiration. It is even necessary to study its usefulness and teach others at a time when elementary school students are using a handset. So we get acquainted with popular free mobile apps that help us learn the language. To make the most of these programs, you must be at least russian or English. You have learned these languages at school, college or high school. If you have not learned for free in those days, you will have to pay and go to an additional lesson.

195

**Annotatsiya:** Oldindan ochig'ini aytib qo'ya qolay: biror-bir dastur sizni birpasda tarjimonga yoki til bilimdoniga aylantirib tashlamaydi. Bular shunchaki yordamchilar, xolos. Asosiysi – sizdagi qobiliyat, g'ayrat va intilish.

Hatto boshlang'ich sinf o'quvchilari qo'l telefoni ishlatayotgan bir paytda uning foydali jihatlari o'rganish va boshqalarga ham o'rgatish zarur. Demak, til o'rganishga ko'maklashuvchi mashhur bepul mobil ilovalar bilan tanishamiz. Bu dasturlardan samarali foydalanish uchun kamida rus yoki ingliz tilidan boxabar bo'lishingiz kerak. Bu tillarni maktab, kollej yoki oliy o'quv yurtida o'rgangansiz. Agar o'sha davrda tekin o'rganmagan bo'lsangiz, pul to'lab qo'shimcha darsga borishingizga to'g'ri keladi.

**Keywords:** learning principles, general didactic principles, methodological principles, methodology, social contradictions, regularity, system, vocabulary.

**Kalit so'zlar:** o'rganiish tamoyillari, umumiy didaktik tamoyillar, metodik tamoyillar, metodologiya, tizim, lug'at.

As technology advances, it is moving deeper into our lives, making a lot of our work easier. So are the programs that specialize in language teaching. For example, if you type a word in electronic dictionaries, it will instantly reveal its meaning. You will also easily know the meaning of the phrases involved in this word.

**Duolingo** (works on Android, iOS, Windows Phone). One of the most popular teacher programs. With this mobile app, you can learn many languages of the world in English. You have the opportunity to learn English and German in Russian. There

are various interesting games to study the rules of grammar and to increase vocabulary. The program also includes many exercises to improve pronunciation. At one point, duolingo can be used on the phone, tablet and site through a single profile.

**LinguaLeo** (Android, iOS, Windows Phone) This application is intended for Russian-speaking people. You can learn English through it. Like many other applications, you choose teaching styles, themes, and reading speed to suit yourself. It has a large stockpile of audio and video materials. LinguaLeo is mostly convenient for starters and children. He also has paid departments. However, many options can also be used through the free part.

**Memrise** (Android, iOS) Switching to language-teaching games will not lead to the expected result. Learning a language requires a constant increase in the wealth of determination, labor, and dictionaries. You can be familiar with the construction of speech and the pronunciation of words, but if you do not develop your lecture, you become a wingless bird.

One of the best ways to master a foreign language is to read books and articles in that language. However, such a review seems very painful for an unpredictable person. Therefore, not only are they limited to applications, but read adapted books that are tailored to the levels of the learners.

**Busuu** (Android, iOS) This application includes several applications. You can learn English, German, French, Japanese, Spanish, Chinese, Portuguese, and other languages through it. The so-called "English for tourists" app is also used to help those traveling to speak English quickly. The application can also be used offline. And to expand their capabilities, you need to buy it.

**Rosetta Course** (Android, iOS) You can learn many languages through this app. It greatly helps to study the grammatical and linguistic construction of words. It teaches by applying the rules in practice, not teaching. Like other programs, the full form of Rosetta Course is paid.

In addition, there are dictionaries that translate into Uzbek-Russian, Russian-Uzbek, Uzbek-English, English-Uzbek, and these three languages that work on Android and iOS systems. They are much more profitable for starters.

Another important statement is that if you use an application that is not listed and it is convenient for you, this is the best program. If necessary, you can also try the applications that are counted above, along with other mobile apps.

Modern gadgets are suitable not only for work and entertainment, but also for productive workouts. Recently, it was difficult to believe that it was possible to learn English because of computer programs, and now it has become commonplace. In this article we will look at several prominent representatives of this software, whose goal is to teach some parts of the English language

Among the most effective approaches to teaching Chite language, you can demonstrate language teaching methods in distance education through information and communication technologies. There are very few opportunities for language learning using computer technologies, especially Interne. They are manifested in the following: 1) actively using the knowledge and skills they have gained in oral relations in Chite, learning to use the language mathematics he received not only in his speech but also in understanding the speech of his acquaintance, whom he met through Inteert; 2) developing flexible skills to move his or her speech knowledge to changing situations of relationships; 3) create a strong, immediate motivation for organizing a conversation that is carried out in the form of informal communication, learning to speak, and a desire to react closely to the truth; The main rules of

irrigation, which are also needed to be paid to them in the preparation of educational activities in vocational education.

### **Conclusion**

In conclusion, Learning is not fun or burdensome. It is necessary to use the reserves of the mind, which are not usually involved in education, in order to improve the effectiveness of implementing it both intelligently and incomprehensibly. Thus, the possibility of the use of an accelerated method of remote learning can be considered in three ways:

- The ratio of hours of instruction by state standard in distance learning and in secondary school.
- comparison of curriculums
- Results of teaching in simple and accelerated media In remote learning conditions, intensive methods can be applied at each stage of teaching due to its flexibility and excellent educational results. It is necessary to determine the objectives of each of these stages.
